

The Princeton ACM / IEEE Computer Society opens its 2015–2016 season with our annual SIGGRAPH Computer Graphics Video Review. These jury-selected films demonstrate cutting-edge advancements in graphics research, highlighting creative visual effects and scientific renderings. Some of the SIGGRAPH films have gone on to receive Oscars and other awards. Ranging from fascinating to frightening, these animations are always memorable!

The Video Review will be preceded by a special guest lecture to commemorate

the 101st birthday of Martin Gardner. This year's speaker will be remembering the late John Nash and will also discuss combinatorics and topology.

We will be co-celebrating Martin Gardner's 101th birthday by hosting a **Celebration of Mind party** http://www.celebrationofmind.org/wordpress_site/ as part of our meeting. Gardner (1914–2010) was the editor of the Mathematical Games column of *Scientific American* from 1956–1981.

Our special guest speaker will be **Tony Bahri** from Rider University

Our 36th annual computer graphics film show features the latest and greatest computer animations, direct from the **ACM SIGGRAPH Conference** held this past summer in Anaheim.

Our special guest speaker this year is **Adam Finkelstein** of Princeton University

Co-sponsored with

DATE: Thursday, Oct. 15, 2015. Event starts at 7:15 PM, Graphics show starts around 8:15 PM

PLACE: Friend Center Auditorium Room 101, Olden and William Streets, Princeton University, Princeton, N.J.

INFORMATION: Dennis Mancl 908.582.7086

ONLINE INFORMATION: <http://PrincetonACM.acm.org/meetings/mtg1510.pdf>

All **ACM/IEEE-CS** meetings are open to the public. Students and their parents are welcome. There is no admission charge.
